I'm a Computer Science Graduate from the University of Otago. I'm eager to get involved in the software development industry, leveraging my strong technical skills, problem-solving abilities and passion for innovation. My past work and every day experiences have taught me the skills and value of effective communication, adaptability and teamwork. I'm ready to utilise and display these skills when entering this dynamic and challenging field.

WORK EXPERIENCE

Project Administrator Intern

Naylor Love | Wellington, NZ | 2023-2024

Assisted in managing and overseeing construction projects, including the James Cook Hotel and Wellington Town Hall. Collaborated with a team to supervise general operations, ensuring adherence to all procedures. Effectively communicated with private clients and internal divisions. Supported project scheduling and documentation tasks.

Marketing and Web development Specialist

Asian Events Trust | Wellington, NZ | 2019-2024

Collaborated with a team to develop the marketing strategy and website for Wellington's annual Lunar New Year Festival. Responsibilities included designing and distributing marketing materials, organising social media advertising campaigns on various platforms, and creating and maintaining the festival website.

Receptionist

Black Gates Meek & Dong Optometrist | 2022

Assisted with daily administrative tasks and managed appointment scheduling for patients at an optometry clinic. Provided excellent customer service, ensuring a positive experience for all patients.

Social Media Manager & Content Creator

Professional Fortnite Gamer | "phluxzy" | 2020-2021

Managed social media marketing for a personal gaming account, achieving significant growth across multiple platforms by increasing Twitch following to 16,000 followers, expanding Twitter following to 4,500 followers, and growing YouTube subscribers to 2,150 by creating and editing over 70 videos. Additionally, represented gaming agencies FURY Australia, Team Process, and Overt in regular tournaments.

EDUCATION

Bachelor of Computer Science

University of Otago
2022-2024

University of Otago Performance
Entrance Scholarship

TECHNICAL SKILLS

- Java
- Python
- JavaScript
- HTML
- CSS
- SQL
- C#
- C
- C++
- R

SOFT SKILLS

- Teamwork
- Problem Solving
- Communication
- Adaptability
- Motivation
- Leadership
- Time Management
- Creativity
- Initiative

PERSONAL PROJECTS

Available on my GitHub repository

Shared Living Finance Tracker

Developed a full-stack web application to manage finances in a shared living environment between each tenant and landlords using Embedded JavaScript, Nodejs, MySQL. Created dual portal system with role specific functionality allowing tenants to manage personal bills and landlords to overview properties. Implemented secure email authentication with session management and comprehensive transaction tracking. Deployed on AWS using Terraform, this project utilises EC2 instances, RDS, Lambda and CloudWatch for scalable and reliable hosting with automated monitoring and database maintenance.

Fitness Tracker

Developed a full-stack fitness tracking application with React, Django and PostgreSQL. Implemented secure JWT authentication, RESTful API endpoints and an interactive analytics dashboard using Chart.js to visualise personal progress metrics. Designed and optimised a recommendation algorithm that creates suggestions by analysing user workout history. I also developed a gamified achievement system that allocates specific ranks based on their personal lifting records. Through this project, strengthened my full-stack developmental skills and gained hands-on experience with Django REST Framework's serialization and authentication systems.

Study Planner

Designed and built a command line C++ student study planner application. Leading a group of four using Agile methodologies, I coordinated sprint planning, daily standups and retrospectives to ensure consistent progress. Implemented the core architectural design, study tools, calendar view and time-tracked study sessions. Established a robust CI/CD pipeline on our protected branch which ensured tests passed before merging. Achieved 80% code test coverage, automated documentation using CodeDocs and maintained 88% non-duplicated code using Codeacy.

EXTRA-CURRICULAR INTERESTS

AI Environment Hackathon - Teamwork & Problem Solving

I collaborated with a team to develop an innovative solution to address beach pollution, which placed us third in the 2024 Dunedin AI for the Environment Hackathon. Our project involved creating a neural network model that utilises wave and pollution data to predict locations of rubbish accumulation on beaches. Our success was driven by effective teamwork where we leveraged each member's strengths to tackle this challenge. This experience has equipped me with the ability to work in a high pressure team environment to solve real-life issues using AI.

Rotary Youth Leadership Awards - Leadership & Initiative

Participated in RYLA 2025 which is a leadership development program designed to develop teamwork and communication skills as a leader. I had the opportunity to take initiative and lead a group of 6 young adults through a variety of different challenges. This experience taught me how to adapt to different team dynamics and make quick decisions under pressure as a leader.

Video Gaming - Time Management & Creativity

I pursued a professional career in Fortnite for three years, regularly competing in and achieving notable placements in official tournaments against top players in the Oceanic region. Throughout this period, I effectively balanced my gaming career with my high school studies. This required effective time management, as I prioritised academic responsibilities while actively participating in competitions and dedicating time to creating content e.g. streaming and video editing. This experience honed my ability to manage multiple commitments efficiently, demonstrating my capacity for discipline and organisation.
